MANUFACTURER
OF GLAZING UNITS
AND SPECIAL GLASS

EFFECT GLASS S.A.

EFFECT GLASS S.A. is a manufacturer of high quality insulating and tempered glass featuring one of the most modern machine parks in Poland based on advanced technological solutions.

The company was established in 1995. It has two production plants: in Kielce and in the village of Wędkowy near Gdańsk. Thanks to the automated production process, highly qualified staff and operation based on the best, proven suppliers, current production capacities of both plants exceeds tens of thousands of pieces of insulating glass a day. The potential of the company allows to maintain the highest standard of customer service.

EFFECT GLASS S. A. has an innovative, integrated computer system that supports comprehensively all the areas of company's activity starting with the acceptance of the order, throughout the production cycle, packing, up to shipping of finished products.

Products manufactured by EFFECT GLASS are marked by the EFFECTOR brand and have all required test certificates and appropriate certificates of the Institute of Glass and Ceramics, and their high-quality and reliable customer service is confirmed with Quality Management System Certificate in accordance with PN:EN ISO 9001:2015.
